

## **Windchill Business and System Administration**

**Course Code: TRN-3155-T**

**Course Length: 3 days**

After completing this course, you will be well prepared to set up and manage a basic Windchill PDMLink implementation at your company.

In this course, you will learn how to perform basic Windchill PDMLink administration tasks. You will learn how to plan and create user accounts and groups, and how to plan and create information management storage strategies. Other topics will include life cycles, workflows, teams, and configuring domain policies. These skills enable a business administrator to configure Windchill PDMLink to meet business needs.

At the end of each module, you will complete a skills assessment. The questions are used to help reinforce your understanding of the module topics and form the basis for review of any topics, if necessary.

## **Course Objectives**
