

Piping using Creo Parametric 2.0

Overview

Course Code	TRN-3910-T
Course Length	3 Days

In this course, you will learn how to manually create (non-specification driven) mechanical piping designs using Creo Parametric 2.0. This includes learning how to configure pipelines, how to route pipelines, and how to insert pipe fittings such as valves and reducers. You will also learn how to create specification driven industrial piping designs using Creo Parametric 2.0. This includes learning how to use schematic diagrams created with Creo Schematics to drive 3-D industrial piping designs created within Creo Parametric 2.0. Finally, you learn how to document piping designs by creating drawings that include BOM tables, pipe bend tables, and engineering information, as well as how to export ISOGEN format files for creating pipeline, spool and systems isometric drawings.

At the end of each module, you will complete a set of review questions to reinforce critical topics from that module. At the end of the course, you will complete a course assessment in Pro/FICIENCY intended to evaluate your understanding of the course as a whole.

Course Objectives

- Understand the manual piping design process
- Understand the specification-driven piping design process
- Create piping assembly structures
- Configure and route pipelines
- Move and modify pipelines
- Create pipe solids and fabricate pipes
- Configure and insert fittings
- Create piping report information
- Create piping drawings
- Configure a piping specification database
- Configure project specific data files
- Create specification-driven pipelines
- Create schematic driven pipelines

Prerequisites

- Introduction to Creo Parametric 2.0 or equivalent experience

Audience

- This course is intended for engineers who are involved in the 3-D routing of mechanical piping systems and industrial piping systems
-

Agenda

Day 1

Module	1	Introduction to Piping
Module	2	Creating Piping Assembly Structures
Module	3	Configuring and Routing Pipelines
Module	4	Moving and Modifying Pipelines
Module	5	Configuring and Inserting Fittings

Day 2

Module	6	Creating Solid Pipeline Models
Module	7	Gathering Piping Information
Module	8	Creating Piping Drawings
Module	9	Specification Database Overview
Module	10	Setting Up Specification Databases: Piping
Module	11	Setting Up Specification Databases: Fittings

Day 3

Module	12	General Master Catalog Files
Module	13	Configuring Project-Specific Data Files
Module	14	Specification-Driven Routing and Inserting Fittings
Module	15	Using Creo Schematics Process and Instrumentation Diagrams Data
Module	16	Schematic Driven Pipeline Modeling
Module	17	Using ISOGEN PCF Data

Course Content

Module 1. Introduction to Piping

- i. Understanding Piping Design Methods
- ii. Manual Piping Development Process
- iii. Specification-Driven Piping Development Process
- iv. Understanding Piping Terminology
- v. Understanding 2-D Schematic Piping Designs

Knowledge Check Questions

Module 2. Creating Piping Assembly Structures

- i. Planning Piping Assembly Structures
- ii. Piping Assembly Structure: Sub-Assembly
- iii. Piping Assembly Structure: No Sub-Assembly
- iv. Piping Assembly Structure: Sub-Assemblies at Top Level
- v. Understanding Piping Large Assembly Management Tools
- vi. Creating and Configuring Piping Skeletons
- vii. Sharing Routing Geometry
- viii. Assembling Piping Components Using Component Interfaces

Knowledge Check Questions

Module 3. Configuring and Routing Pipelines

- i. Understanding Pipeline Routing
- ii. Configuring Non-Specification-Driven Pipelines
- iii. Routing Pipelines
- iv. Routing Flexible Hoses

Knowledge Check Questions

Module 4. Moving and Modifying Pipelines

- i. Adding Points and Moving Pipe Segments
- ii. Modifying Pipeline Routing

Knowledge Check Questions

Module 5. Configuring and Inserting Fittings

- i. Understanding Fittings
- ii. Creating Fittings
- iii. Inserting Fittings

Knowledge Check Questions

Module 6. Creating Solid Pipeline Models

- i. Creating Solid Pipes
- ii. Extracting Models

Knowledge Check Questions

Module 7. Gathering Piping Information

- i. Using Piping Reporting Tools

Knowledge Check Questions

Module 8. Creating Piping Drawings

- i. Creating Piping Drawings
- ii. Displaying Piping Report Parameters

Knowledge Check Questions

Module 9. Specification Database Overview

- i. Understanding the Piping Specification Database
- ii. Master Catalog Directory and File Structure: Pipes
- iii. Master Catalog Directory and File Structure: Fittings

Knowledge Check Questions

Module 10. Setting Up Specification Databases: Piping

- i. Piping Master Catalog Directory File
- ii. Pipe Design Master Catalog Files
- iii. Pipe Manufacture Directory File
- iv. Pipe Manufacture Master Catalog Files
- v. Bend Machine Master Catalog Files

Knowledge Check Questions

Module 11. Setting Up Specification Databases: Fittings

- i. Fitting Master Catalog Files
- ii. Mapping Catalog Data to Fittings
- iii. Understanding Fitting Libraries and Fitting Models
- iv. Configuring Specification-Driven Fittings
- v. Bolt Nut Master Catalog Files

Knowledge Check Questions

Module 12. General Master Catalog Files

- i. Master Catalog Files: Piping Material File
- ii. End Compatibility File
- iii. Insulation Files
- iv. Combined Size Code File
- v. Units System File

Knowledge Check Questions

Module 13. Configuring Project-Specific Data Files

- i. Configuring Auto-Selection Files
- ii. Configuring Specification Directory Files
- iii. Insulation Directory Files
- iv. Fitting Category Map Files
- v. Configuring Piping Config.pro Options

Knowledge Check Questions

Module 14. Specification-Driven Routing and Inserting Fittings

- i. Specification-Driven Pipeline Routing
- ii. Specification-Driven Fitting Insertion
- iii. Design Rules
- iv. Routing Continuous Fittings
- v. Non-Break Fittings

Knowledge Check Questions

Module 15. Using Creo Schematics Process and Instrumentation Diagrams Data

- i. Process and Instrumentation Diagrams Overview
- ii. Creo Schematics Concepts and Terminology
- iii. Investigating Process and Instrumentation Diagrams
- iv. Exporting Design Information

Knowledge Check Questions

Module 16. Schematic Driven Pipeline Modeling

- i. Designating Schematic Information
- ii. Routing Pipelines Using Schematic Information
- iii. Inserting Fittings Using Schematic Information
- iv. Schematic Consistency Check Report
- v. Updating Piping Designs from Creo Schematics

Knowledge Check Questions

Module 17. Using ISOGEN PCF Data

- i. Creating ISOGEN PCF Data

Knowledge Check Questions
